

# طرح های سال ۹۵

## Bacteriology

1	Safety of pentavalent vaccine (combined DTPw-HepB-Hib) in infants in Shiraz
2	The comparison of diagnostic value of serum procalcitonin and C reactive protein in neonates with sepsis
3	Evaluation of demographic data, risk factors, antibiotic regimens and outcome of patients with bloodstream infection caused by vancomycin-resistant (VRE) and vancomycin sensitive enterococci in Nemazee teaching hospital, 1394- the first half of 1395
4	
5	Design, expression and evaluation of a "MntC, Hla, Soco10723" multi-epitope protein vaccine candidate against Staphylococcus aureus

## Virology

1	Prevalence of hepatitis C virus variants resistant to NS3 protease inhibitors in hepatitis patients.
2	Determination of relationship between hepatitis C NS3 binding domain mutations and treatment resistance in hepatitis C virus infection.
3	Prevalence of IgG antibodies against Zika virus (ZIKV) and West Nile virus (WNV) infections in Southern Iran.
4	Evaluation and Detection of Zika virus and West Nile Virus RNAs in possible mosquito vector collected from southern Iran by rt-Real-Time PCR assay.
5	
6	EBV modulate host cell miRNA-15 to promote BCL2 gene expression and cell survival in infected B lymphoma cells

## Mycology

1	Incidence, risk factors and outcome of fungal colonization in patient admitted in NICU of Shiraz Namazi hospital (cohort study)
2	Identification of environmental fungal colonization in oncology wards and evaluation of change in fungal colonization pattern in children with cancer in Amir oncology hospital during a 1-year period
